University of Maryland

The University of Maryland is a land-grant institution of higher learning stressing programs of excellence in teaching, research and service.

Now in its 164th year, the University is one of the 10 largest universities in the nation, with over 41,000 students enrolled in its on-campus daytime programs. An additional 54,450 are enrolled in the fiscally self-sustaining programs of University College, which maintains centers for adult education throughout the State and in 24 foreign countries. The teaching and research staff includes more than 6,000 full-time and part-time personnel.

Undergraduate curricula are offered in over 103 fields, master's degrees in 64 departments and doctoral degrees in 60 departments. In the number of doctorates granted annually, the University ranks among the top 30 institutions in the nation.

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. Five years later its name was changed to the University of Maryland, and it was given power to confer additional degrees. Subsequently, the University opened a School of Dentistry (1840), the first such school in the world, and then added Schools of Pharmacy (1871), Law (1882) and Nursing (1889).

The College Park campus of the University was opened in 1859 as the Maryland Agricultural College under a charter secured in 1856 by a group of Maryland planters. After a disastrous fire in 1912, the State acquired control of the College and bore the costs of rebuilding. In 1920 the State took over the faculty-owned University in Baltimore, merging it with the State-owned institution at College Park to form the present-day University of Maryland.

In 1886 the Delaware Conference Academy was founded by the Methodist Church in Princess Anne, Maryland. The institution was taken over by the State of Maryland in 1926 and became a division of the University of Maryland in 1948. This unit was called Maryland State College, and operated autonomously under its own president until July 1, 1970, when it became a branch of the University, known as the University of Maryland, Eastern Shore.

UNIVERSITY OF MARYLAND (Continued)

Presently located on the College Park campus are the Colleges of Agriculture, Arts and Sciences, Business and Public Administration, Education, Engineering, Home Economics, and Physical Education, Recreation and Health; University College; School of Architecture; Graduate School; School of Library and Information Services; and Summer School. There are also a number of institutes, bureaus and service programs. On the Baltimore City campus there are the Schools of Dentistry, Law, Medicine, Nursing, Pharmacy, and Social Work; the Psychiatric Institute; Center for the Study of Trauma; and University Hospital. A third campus was opened in 1966 just west of Baltimore City—the University of Maryland, Baltimore County (UMBC).

The research programs at the University derive their existence and vigor from a faculty comprised of internationally recognized scholars and scientists. Exceptional research facilities include the Institute for Child Study, the National Resources Institute, a laboratory for basic behavioral research, Van de Graaff accelerators, an assortment of modern computers, a nuclear reactor, wind tunnel, a psycho-pharmacology laboratory, laboratory models for meteorological phenomena, and collaborative arrangements with many nearby government installations. A new, pioneering, spiral ridge cyclotron was completed in 1968. In addition, the University of Maryland is a member of the initial group of 34 universities incorporated to manage a new 200 BeV high energy accelerator at Weston, Illinois.

University libraries include more than a million volumes on the College Park and Baltimore City campuses, plus nearly half a million microtexts, slides, film strips, negatives, prints, music scores, and recordings. The University is a regional depository for Federal documents. Special collections include the Marylandia, Katherine Anne Porter, Rare Book, East Asian, and Health Sciences Historical Collections.

In recent years the University of Maryland has received national recognition in numerous areas. In 1964 it established a chapter of Phi Beta Kappa. In 1969 the Association of American Universities elected the University to its selective membership.

In research, scholarship and in the number and quality of its graduates, the University is a productive member of the community of great state universities.

Candidates for Degrees

The June 1971 Class Roster is comprised of degree candidates from the undergraduate schools and the Graduate School at the University's College Park campus and from University College since June 1970. HONORS DESIGNATIONS

Candidates for bachelors' degree eligible to graduate "With Honors" or "With High Honors" are so indicated in the alphabetical listings by college. These persons are eligible for the appropriate designation if they have completed at least two years of resident work (60 semester hours) at the time of graduation with a scholastic average of B or higher. (Computation does not include grades for courses taken during the last semester of registration before graduation.) The candidates must also rank in the upper fifth of the graduating class in their respective colleges. "With High Honors" is awarded to the upper tenth of those in each college, if they qualify, and "With Honors" is awarded to the second tenth of those in each college, if they qualify.

Academic Degrees

REFERENCE: *Academic Degrees*,
Office of Education, U. S. Department of
Health, Education and Welfare, 1960

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

From the continent, the use of academic degrees spread to English universities. Harvard University, William and Mary, and Yale followed the British pattern in the New World.

THE BACHELOR'S* DEGREE

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree Bachelor of Arts was first conferred in America in 1642 on nine young men, comprising the first graduating class of Harvard College. Yale conferred its first Bachelor of Arts in 1702; Princeton in 1748; William and Mary in 1753; Pennsylvania in 1757; and Columbia in 1758.

The degree Bachelor of Science, was awarded to four graduating members of the class of 1851 of Harvard University, probably the first to receive this degree from any institution. From 1851 to 1905, the degree was conferred only upon students registered in the Lawrence Scientific School; after 1905, on students of Harvard, also.

THE MASTER'S DEGREE

The master's degree is an academic honor conferred upon students who have successfully completed one or two years' work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word "magister" connected with a qualifying phrase, was used among the Romans as a title of honor; but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized faculties were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their course of studies, for their diligence and knowledge, and had already received the degree of baccalaureus (bachelor) were called *magistri artium* (master of the liberal arts).

THE DOCTOR'S† DEGREE

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, in Italy, which received from the Emperor the right of appointing *doctores legum* (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing *doctores canonum et decretalium* (teachers of the canon law); and when the study of the civil law came to be combined with that of the canon law, the title was changed to *doctor utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

*Sometimes designated as the baccalaureate degree, from the Latin *baccalaureus* from *baccalaris* "under the influence of" and *laurus* "laurel" used as a designation of honor, distinction, or fame.

†The *Oxford English Dictionary* defines a doctor, in the academic sense as, "One, who in any faculty or branch of learning, has attained to the highest degree conferred by a university."

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree, and requires two to five years, the writing of a thesis, and the passing of written and oral examinations.

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioners degree, and the research degree. The first type represents advanced training for the practice of various professions, principally: Doctor of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor, and Doctor of Pharmacy. These degrees carry no implication of original research and are classified by the U. S. Office of Education, with bachelor's degrees, as the first professional degrees.

The second type of doctor's degree is classified as research doctorates representing prolonged periods of advanced study usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States by Yale University in 1861.

Academic Costume

REFERENCE: *American Universities and Colleges*,

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States. Each of the three academic degrees—bachelor, master, and doctor—has its own distinctive gown and hood. The bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of this gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture	Maize	Medicine	Green
Arts, Letters, Humanities	White	Music	Pink
Business Administration,		Nursing	Apricot
Commercial Science	Drab	Oratory	Silver Gray
Dentistry	Lilac	Pharmacy	Olive
Economics	Copper	Philanthropy	Rose
Education, Pedagogy	Light Blue	Philosophy	Blue
Engineering	Orange	Public Health	Salmon
Fine Arts, Architecture	Brown	Physical Education	Sage Green
Forestry	Russet	Science	Golden Yellow
Home Economics	Maroon	Social Service	Citron
Humanities	Dark Crimson	Surgical Chiropody	Nile Green
Laws	Purple	Theology and Divinity	Scarlet
Library Science	Lemon	Veterinary Sciences	Gray

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

Certain institutions in this country and abroad have academic costumes of distinctive color and design.
